

Mohammad Tegar Ibrahim

I am an informatics student at Institut Teknologi Telkom Purwokerto (ITTP) who enjoys learning and has a high level of curiosity. I like to learn new things through online bootcamps. I often work on projects during college, such as for midterm exams, final semester assignments, or independent projects. Currently, I am learning React.js and Next.js to enhance my knowledge in front-end development. Due to these experiences, I have good communication skills and can work well in a team or individually.
