

Mohammad Tegar Ibrahim

I am an Informatics student at Telkom University who enjoys learning and has a strong curiosity. I love exploring new things through online bootcamps. I often work on projects during my studies, such as mid-term exams, final semester assignments, or independent projects. Currently, I have mastered React.js, Next.js, Vue.js, NextWeb, NextAPI, NextFlow, Rest API, gRPC to enhance my knowledge in the front-end field. Due to these experiences, I have good communication skills and can work both in a team and independently.

Pengalaman Kerja

Fullstack-dev • Makers Institute

Juni 2025 ~ April 2026 • 11 bulan

This project was created to fulfill an internship assignment at Makers Institute. I use TypeScript as the programming language, with React.js and the NextWeb framework, Tailwind CSS for styling, Redux for state management, and Zustand for server-side state management. I also performed testing and learned various technologies in the NextPlatform ecosystem, such as NextAPI and NextFlow.

Fullstack-Dev • Final project research (Skripsi/TA) Turangie Palm Oil Mill

Maret 2025 ~ Juni 2025 • 4 bulan

This is a project for my Final Assignment as a student at Telkom University Purwokerto. I made this project to get a Bachelor of Computer Science degree. I use Typescript as the programming language, use the Next.js framework, Tailwindcss as the styling, and firebase as the database. I also apply AI and Leafletjs to this project.

Pendidikan

2021 - 2025

Telkom University Purwokerto

S1 Informatika

2018 - 2021

SMA Negeri 1 Bae Kudus

MIPA

Skill

- HTML
- CSS
- C++
- Microsoft Office
- JavaScript
- React.js
- Next.js
- Word
- Tailwind CSS
- Bootstrap 5
- PowerPoint
- TypeScript
- Firebase
- Vue.js
- SupabaseDB
- NextWeb
- NextAPI
- NextFlow
- NextPlatform
- RESTApi
- gRPC
- FastAPI(Python)
- ERP project management
- Google Drive

Bahasa

- Indonesian - Bahasa ibu atau bilingual
- English - Fasih
